### MAP OF CANADA MINI PROJECT

In order to understand the physical and political space of Canada a little better, you will complete the blank map that you receive. There are a number of things that you need to do!

- Include a title for your map
- Draw the current borders around each Province (10) and Territory (13) in pen
- Label each Province and Territory with the correctly spelled name in pen
- Locate the capital city for each Province and Territory; label and place a dot where they are in pen
- Label the bordering Oceans in pen
- Find one Aboriginal group for each of these different physical regions, record their name in pen where they existed, and give a unique colour for each area where they originated from:
  - BC Coast
  - BC Interior
  - Plains
  - Woodlands/Eastern
  - Atlantic Coast
  - Inuit

You will be marked based on how accurate you are, how much attention you give to details, and how closely you follow instructions! Good luck.
