Name: _____

Block:

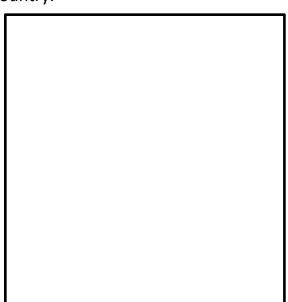

National and Personal Jdentity

We have compared the identity of Americans to Canadians. Now, it is your job to compare the identity of your native country to Canada's.

Think of features that define your native country's identity:

Next, put a + next to the features that are the same as Canada. Put a – next to the features that are different to Canada.

Now, write in full sentences explaining how your native country is the same and/or different to Canada. Make sure to include a topic sentence and a conclusion. Provide evidence and examples explaining how these two places are different. Draw pictures in the boxes below that show the typical difference between a Canadian and someone from your native country.

Are these stereotypes always true? Why or why not?
